TiO₂ Mesh

The new generation of surgical mesh:

- ➔ Completely covered by a 100 % pure titanium oxide layer.
- ➔ Light weight mesh with reduced material surface for all treatments.
- ➔ Versatile indication specific sizes and designs adapted to the surgeons needs.
- ➔ Large pored mesh structure (2,8 mm) with 47 g/m².
- ➔ Optimized pore structure or highest flexibility
Self inflating for fast and effective laparoscopic handling.
- ➔ Fast and effective mesh placement supports the clinical time management.

PRODUCT CODE	SIZE

Ventral Wall Defect Silo Bag

FEATURE	BENEFIT
• Soft, Pliable Transparent High Quality Medical Grade Silicone Material	• Minimizes potential for damage to exposed viscera • Enables visualization for continuous monitoring of bowel perfusion • Allows gradual reduction of viscera into abdominal cavity decreasing potential for complications
• Flexible, Soft Silicone Wrapped Spring around Proximal Opening	• Enables placement of Bentec Silo Bag at patient bedside • Eliminates need for suture placement to maintain stability during use
• Range of Spring Opening Sizes	• Accommodates ventral wall defects & visceral extrusions of varying sizes
• Mesh Reinforced Distal End with Preformed Hole	• Provides mechanism for attachment to suspension apparatus to maintain traction on bag & support bowel reduction by gravity
• Closed System	• Helps prevent loss of peritoneal fluid & bacterial contamination
• Sterile Product	• Minimizes potential for contamination of exposed viscera • Reduces potential of infection
• Not Made with Natural Rubber Latex	• Eliminates potential for latex induced allergic reaction

Topical Skin Adhesive

LiquiBand® Flow Control

Key Features

The **superior control** of LiquiBand® Flow Control allows clinicians to confidently and safely close wounds specifically around the eye and within the **facial triangle**. Perfectly suited for use in the Emergency Department.

LiquiBand® Standard

Key Features

LiquiBand® Standard removes the need for dressings and acts as a **water-resistant barrier** so patients can shower without compromising the wound closure. Perfectly suited for use in the Emergency Department.

Key Features

LiquiBand® Surgical S provides **microbial barrier protection**.

LiquiBand® Exceed™

Key Features

LiquiBand® Exceed offers the improved attributes of **precision** and **controlled application** with added advantages of a **new tip design**.

LIQUIBANDFIX8®

LAPARO HERNIA MESH FIXATION DEVICE

Key Features

Advanced design *LIQUIBANDFIX8*® offers accurate fixation and was designed for patient safety

Designed for atraumatic hernia mesh fixation

Innovative liquid anchors result in strong hernia mesh fixation reducing the risk of some common post operative complications such as

- » Neuralgia¹
- » Paresthesia¹
- » Mechanical Tissue Trauma¹

Non-Sticking /
Atraumatic Tip

Quantity Indicator

Controlled Delivery
Trigger

Ergonomic Design

LIQUIBAND FIX8[®]

OPEN HERNIA MESH FIXATION DEVICE

Key Benefits

Innovative tip design ¹

- Removable tip for topical wound closure and mesh fixation
- Designed to project liquid anchors drop by drop
- Guarded aperture to prevent tip blockage

Simplified Priming ²

- Simple priming process
- Pre assembled
- Easy tip removal for topical wound closure

Patient comfort

- N-Butyl 2 cyanoacrylate adhesive* can be considered as a good replacement for sutures in inguinal hernia repair leading to lesser post operative morbidities and a better quality of life. ⁸

N-Butyl 2 Cyanoacrylate adhesive

- Mesh fixation in 10 sec ³
- Reduced risk of trauma & post-operative complications ⁴
- Low exothermic reaction ⁵

Precise & Ergonomic ⁶

- Easy handling
- Delivers at least 45 liquid anchors
- Each trigger dispenses 12.5mg of adhesive

Cost Effectiveness

- N-Butyl 2 cyanoacrylate adhesive* optimises cost in open hernia procedure due to less turnaround time which results in improved theatre output without compromising patient care.

PRODUCT CODE	PRODUCT NAME
LBFC0010	LIQUIBAND FLOW CONTROL
LB0002	LIQUIBAND STANDARD
LBS-S0001	LIQUIBAND SURGICAL S

WE ALSO SPECIALISE IN:

***INTERVENTIONAL RADIOLOGY**

**Biopsy
Drainage
Cardiology
Mammography**

***OPHTHALMOLOGY**

***UROLOGY**

***RESPIRATORY**

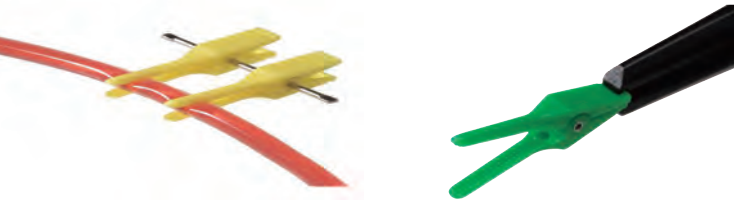

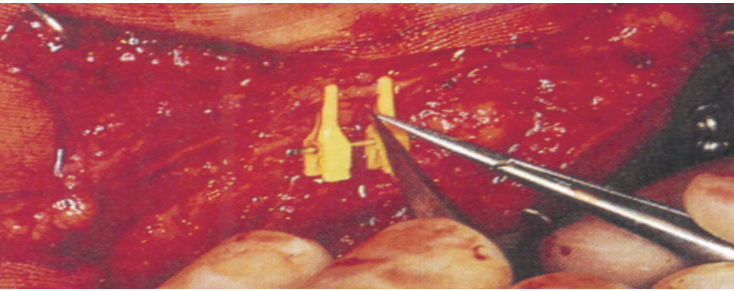

***PPE - Personal Protective Equipment**

***** And many more related apparata and/or equipment**

HEMOSTASIS

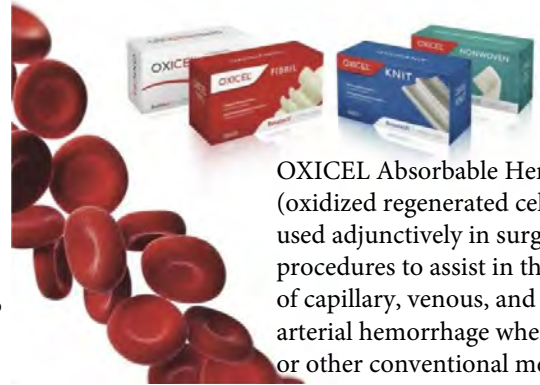

"Internal Bleeding Stoppage"

DMC Disposable Microvascular Clip

- * Product is a temporary Hemostatic clip made of polycarbonate, a stainless steel clip
- * This is a Hemostatic clip for internal use to temporarily stop bleeding by pinching microvessels during microvascular suturing.
- * It cannot be used in the central blood circulation or the central nervous system

OXICEL® Absorbable Hemostat Oxidized Regenerated Cellulose

OXICEL Absorbable Hemostat (oxidized regenerated cellulose) is used adjunctively in surgical procedures to assist in the control of capillary, venous, and small arterial hemorrhage when ligation or other conventional methods of control are impractical or ineffective.

WOUND CARE

NOXMARIA

Noxmaria is our revolutionary wound wash product that has been formulated with one of the most purest form of HOCl in order to ensure that every patient will be receiving the best possible wound care solution at an affordable price.

FLAMINAL "enzyme alginogel"

Versatile. Dependable. Unique.

Flaminal® Hydro

slightly to moderately exuding wounds

Flaminal® Forte

moderately to heavily exuding wounds

Comprehensive care
for any wound type
